Subject: Antibiotics in Animal Feed
Auto forwarded by a Rule

Because of the danger that antibiotics in animal feed will contribute to the problem we're experiencing at present--- that bacteria are becoming resistant to the antibiotics we overuse on them--- we need to stop one part of the problem to which your agency's regulations apply. We agree with the Center for Science in the Public Interest that banning medically useful antibiotics in animal feed could save human lives when life-threatening bacterial infections need to be treated with antibiotics which still have the power to save lives. Please ban antibiotics in animal feed. E and J Cook
